Washing Instructions

Washing

Always look for the garment care label and follow the washing instructions. Washing machines, powders and fabrics are specially manufactured to ensure that when washed at the right temperature, your clothes will come out looking their best time after time.

Washing tips

- Before washing, close all zips, undo all buttons and flatten out collars and cuffs
- Check pockets and linings for loose or sharp objects
- Turn garments inside out to reduce abrasion, so avoiding contamination from other garments during the wash cycle
- Always read the label for individual garment instructions, such as washing temperature
- Garments of similar colours can be washed together where stated on the care label
- We advise a cool wash on all light coloured garments
- Always use the correct amount of detergent depending on how soiled the garments are
- Check garments regularly for marks or stains and remove as soon as possible (Pre soak may be needed)

Drying

Always check the care label to see whether the garment can be tumble dried. We recommend allowing most Under Armour garments to dry naturally or tumble dry on a low heat. For best results, pull garment into shape when damp.

Ironing

The iron symbols advise the optimum temperature at which to iron.

The dots represent the recommended iron temperature; the more dots, the hotter the iron.

- | | | | |
|--|--------------------------------------------|--|----------------------------------------|
| | Iron at any temperature, with steam or dry | | Iron on a high heat (up to 2000 - Hot) |
| | Iron on a low heat (up to 1100 - Cool) | | Do not iron |
| | Iron on a medium heat (up to 1500 - Warm) | | |

On Field Match Play Garments

Wash match play garments promptly. The sooner you pre-treat and launder the stained clothing the better your results will be. Do not allow mud or stains to set. Do not leave wet or dirty jerseys in kit or gym bags where smells and permanent stains will develop. If a stain is not removed in washing, we would suggest the following:

- Do not let garments dry out as this will set the stain
- Soak the stain in pre-wash; in the case of severe staining it may be necessary to apply a stain remover directly to the affected area, then launder again
- Do not dry the garment until the stain is removed. Once the stain is removed, launder as per usual custom

Tips

- Pre-treat heavily soiled spots
- Apply undiluted laundry detergent
- Pre-soak garments with heavy stains with a good laundry detergent for 1-3 hours
- Sensitive stains should be rinsed in cold water, and then washed with non-chloride bleach product
